

## Railroads, Coal, and Steel Working Together

**T**HE 1850s were an amazing time to live in Johnstown! Three new industries were getting their start all at the same time. It wasn't a coincidence because these three needed each other to grow, thrive, and later, to survive. As you read the article "How Johnstown Made its Living" and view the image galleries, use the chart below to organize your thoughts about how each industry depended on the other two.

- 1. UNDERLINE** or make a note everytime you read about two of these industries working together.
- 2. FIND** the square where the two industries intersect in the chart below. List all the ways the two industries needed each other or worked together.
- 3. LOOK** for more clues on the Immigration Timeline and the Johnstown History Timeline linked from the Student Resources Web page.
- 4. IMAGINE:** What would happen if one of these industries was taken out of the chart? What "holes" would be left? When in Johnstown's history did something like that happen?

<p><b>How Three Industries Needed Each Other</b></p>	 <p><b>RAILROAD</b></p>	 <p><b>COAL</b></p>	 <p><b>STEEL</b></p>
